**Mission:**
To empower and support displaced foster youth and their resource parents through community building, support groups, and partnerships.

We Are Loved provides counseling and support to ease transitions and assist children entering, and in, the foster care system to assimilate into a new family or move to independent living. The organization provides empathy, meetings, training, encouragement, and outreach, to these children and their resource parents to allow these children to know that they are loved and help them overcome trauma.

They aspire to better fund and grow their various programs, including Love Bags, Birthday Boxes, Holiday Boxes, and backpacks, and to provide resources for additional services for their clients, including guest experts for support group meetings.
